

ACM 160/GM SL

High quality group microphone with 3 microphone capsules

The ACM 160/GM SL is a high quality group microphone with switch and LED. Through the use of three different microphone capsules embedded into the cage and a wide-angle cardioid characteristic it has excellent capabilities in handling more than one person speaking into the microphone. Particularly on occasions where children are involved like communion, confirmations or other events, as well as song, choir, and orchestra recordings. The playback is very dynamic.

Phantom powering	24-48 Volt
Frequency response	50-20,000 Hz
Directivity pattern	wide-angle cardioid
Deviation of nominal curve	± 1 dB
Sensitivity	15 mV/pa
Electrical impedance	200 Ohm
Rear damping	20 dB
Connection	XLR
Surface	nickel plated or black anodized
Length	130 mm
Weight	100 g
Brand	AVE
