

ACM 17/350 ABH-LED

Condenser microphone with LED lighting

The ACM 17/350 LED ABH with integrated LED lighting is a premium quality gooseneck condenser microphone with a cardioid directivity pattern. It offers clear, rich in detail and assertive speech play back and it has high feedback security. It transfers high sound intensity without distortions and ambient noise is strongly minimized. A base (120 cm height and 12 cm diameter) with a plug-in contact for the floor casing and a secure guide notch makes it appear elegant and unobtrusive. The microphone is delivered as a 5-pole version with external power supply for the switchable LED lighting (approx. 5000 K).

Phantom powering	24-48 Volt
Frequency response	60-18,000 Hz
Directivity pattern	cardioid
Deviation of nominal curve	± 1 dB
Sensitivity	15 mV/pa
Electrical impedance	200 Ohm
Rear damping	20 dB
Connection	XLR-5-pin
Surface	nickel plated or black anodized
Length gooseneck	350 mm
Weight	155 g
Total length of tripod and microphone	1,550 mm
Brand	AVE
